

Nature and Creation

Who we are:

NYC is a Christian Ministry for the presentation of Creation and the Creator. It is organized as a not-for-profit cultural association. In addition to our main basis, which is the word of God, we present articles or portions of scientific studies to provide understanding and quotes from interesting writings of Ellen White, as ancillary texts complementary and always subordinate to the Bible.

Our motivation:

For a long time, creationists have been on the defensive and always "responding" to the bold claims of evolutionism. Instead being ahead of them, we have always been a step behind. Good communicators are needed that are willing to take a step forward and make the courageous pro-creationist statements that are needed today; that expose in an interesting way the right answers that our scientists have written. We need to put forth information that is within the reach of children and young people of different ages, that form and inform them from the beginning, and that is also attractive. We want to fill the gap of the very little literature on this subject, tailored to their minds and their academic training.

Mission:

Given these deficiencies, NYC presents a comprehensive program for a wide and scholarly dissemination of the Creationist model, in attractive courses or seminars, audio-visual presentations, and other current formats, and with a complete plan intended to cover different levels, stages or ages. It is our desire to offer this abundant material with rigorous, documented information, but above all with a highly attractive presentation, to facilitate the work of parents, educators and leaders of religious communities at this difficult time our society faces in the knowledge of God and Creation.

Vision:

In this era of dominant secularism in the world, the children of God are called to be witnesses for Him, proclaiming the fundamental message that He is the only creator and designer of our world, the One who sustains it with his power, as well as being our Redeemer and Saviour. And that is why we owe him adoration (Revelation 14: 7), a fact that is manifested on the Sabbath, the day He created especially for us as a memorial of Creation. The rigorous study of nature, in the light of the word of God, will guide us to a better understanding of the Truth of our origins: Nature was Created by God.

("Know that the LORD, He is God. It is He who has made us, and not we ourselves".

Psalms 100: 3, NKJV)

What we believe:

At NYC we believe in the literal account of Genesis. We believe in a young Creation and a Young Earth. God did not begin creating at some unknown point, and later continued after an indefinite period of time. The days of creation were days of 24 hours, and God created the Earth and the "heavens" in the beginning of the first day, 6,000 years ago. God began and ended all of creation in six days, and on the seventh, on Saturday, He rested. And God blessed that day and gave it to us as a gift. He gave it as a sign between Him and us.

But the Earth is now very different from how God created it. It has deteriorated, it has aged, not so much because of chronological time, but as a consequence of sin and of the destruction caused by humans and by Satan, who is responsible for evil. Finally, God will very soon, recreate a new "Heaven" and a new Earth; but this time, in a single day, in a single moment. He will say, and will be; and the Earth will be perfect for all eternity.

We want to expose the naturalistic commitment, the belief of the majority of today's scientists.

Naturalist commitment:

The naturalists were determined to establish science as a new source of authority in civilization, rather than theology. Richard Lewontin, Harvard geneticist, wrote in his 1997 essay: "We take the side of science despite the obvious absurdity of some of their models....despite the tolerance of the scientific community for stories that have not been tested, the type that start with 'Once upon a time', because we have a prior commitment, a commitment with materialism... We are bound by our prior accession to the material causes, to create a line of research and a set of concepts that produce material explanations, no matter how counterintuitive. In addition, this materialism is absolute, because we cannot allow one divine foot in the door."

The NYC Project:

It is an educational and outreach program, which is serious, responsible and broad, but very attractive, targeted at different age levels, but always with the maximum possible scientific rigour and up-to-date information. Its goal is the presentation of the origin and development of Nature, from a balanced biblical creationist perspective and with discussion of evolutionary theory.

Content of the NYC project:

- A dynamic website and presence on major social networks (Facebook, Twitter)
- The course titled "The Creator of the design", adapted to different youth stages, with content that is divided into topics or teaching units, including not only the transmission of data in a pleasant way by a presenter, but also the active and practical integration of the participating student.
- A series of episodes in 3D animation: "Adventures of the Creation", created with its own characters.
- A comic strip with characters from the animation series "Adventures of the Creation".
- A store with attractive teaching material, auxiliary and documentary, along with merchandising material.
- Abundant supplementary audiovisual material, some from our own line of documentaries, pps, TV programs, movies, etc., and other audiovisual materials selected from the best that exists in the market today.
- A special format of presentations and computer programs.

"Men are needed who pray to God for wisdom, and who, under the guidance of God, can put new life into the old methods of labor and can invent new plans and new methods of awakening the interest of church members and reaching the men and women of the world. Manuscript 117, 1907" (Evangelism, 105)

"Whatever may have been your former practice, it is not necessary to repeat it again and again in the same way. God would have new and untried methods followed. Break in upon the people -surprise them-. Manuscript 121, 1897" (Evangelism, 125)

CALL

EVA · GLOBAL 3D

In order to expedite our work and improve our quality, we have decided to create a **Virtual Animation Team (EVA)**, i.e., a group of collaborators around the world through the internet. In this way, using our address, the work can be created in its different stages by a multitude of volunteers.

Therefore, we appeal to the large number of designers and creative individuals from many Christian institutions and universities that we are sure would be willing to participate in the promotion of Creationism, if they were familiar with a Project such as this.

We hope they get in touch with us.
